JOBO

FOR YOUR BEST IMAGE

Economically valuable.

For novices to digital photography, the JOBO Giga² offers an inexpensive solution to storing your data.

This unique device allows you to connect 7 different card formats: CF I/ II, Microdrive, SM, SD, MM, MS (7in1), and is also usable without power plug all-purpose around the globe – **infinitely mobile**.

Ultra-mobile

Unlike its predecessor, the JOBO Giga² is also usable without any connection to AC power through an integrated Li-Ion battery.

Mobile hard-drive and USB reader in one

The JOBO Giga² offers not only a 7in1 hard-drive, but also functions as a USB card reader with PCs or Macs via USB 2.0.

Unlimited capacity

The simple functionality is controlled with 2 buttons: one button for the power supply and one for the data transfer.

Watch the progress of downloading the card on the LCD Display

Upgrade the size of the hard-disk at any time – **unlimited capacity**.
