

## New! **Power for Digicams *and* Flash**

### *TURBO 2x2*

Twice the power, dual outputs, smaller than the standard Turbo.

For power hungry digital cameras and flashes, Quantum stuffed twice the power into a smaller package. And, now you have two connections, for a camera and flash, two cameras, or two flashes!

Photographers need reliable power now more than ever. Quantum Turbo 2-by-2 provides programmable low voltage for your digicam, and high voltage for your flash at the same time. up with your camera, and camera with flash.

Now your flash keeps

Be assured of reliability because Turbo 2x2 uses the latest Nickel Metal Hydride battery technology, visible "gas gauge", and Quantum's proprietary, built-in charging circuitry. We have cables for all popular digicams and flashes. (see over)

Now you can shoot long, demanding jobs with added "power security".

#### **Full power flash shots, with and without digicam power\***

<b>Quantum Battery</b>	<b>Flash Only</b>	<b>FIast PIus</b>	<b>Recycle Time</b>
	<b>SB80DX, 550EX / Qflash T2</b>
